Projects

Qasr Elbaron Shop Menu [Live Demo](#) [🔗](#)

A special menu for Baron Palace stores located in various governorates of Egypt, displaying the main items, then moving to the sub-items smoothly upon clicking, then the products in each one and their prices. It was developed by React.

Al Mokhtar Compony [Live Demo](#) [🔗](#)

A website for a food grains import and export company. The constants were set out on four pages, and it was agreed that it would be developed in the future to become a wide-ranging commerce.

E-commerce [github Repo](#) [🔗](#)

iCommerce is 80% complete, with login and an admin part to add and edit everything, add reviews, comments, a shopping cart, and buy and sell.

El-salam [Live demo](#) [🔗](#)

A single page for a store selling cosmetics, children's toys, and hairdressing supplies, developed by React

Qasr Elbaron Cafe Menu [Live Demo](#) [🔗](#)

A special menu for Baron Palace Cafe in Mansoura was implemented in an attractive way to make it easy for the customer to search for the favorite product he wants to order.

Profile

I'm a front-end developer with a deep understanding of modern web technologies. I specialize in creating immersive and intuitive user experiences and strive daily to improve website performance.
